THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U.S.C. 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. The following turbines are located in the power plant at Chorzow, Poland:
 - a. One turbo-generator with a capacity of 16,000 KW. This machine was constructed by the Allgemeine Elektrizitaets-Gesellschaft (AEG) in Berlin and was delivered in 1913.¹
 - b. One turbo-generator with a capacity of 16,000 KW. This machine was constructed by AEG and delivered in 1917.²
 - c. One turbo-generator with a capacity of 45,000 KW. This machine was constructed by AEG and delivered in 1942.
 - d. One turbo-generator with a capacity of 45,000 KW. This machine was constructed by AEG and delivered in 1951.
 - e. One turbo-generator with a capacity of 45,000 KW. This machine was delivered sometime in 1952.
 - f. One turbo-generator with a capacity of 18,000 KW. This machine was constructed by AEG and delivered in 1915.

25X1

2. The Chorzow power plant formerly had a total of twelve turbines but they were all very old machines. Most of them were constructed before World War I and had a capacity of only 3,000 to 10,000 KW.³ These machines have either been scrapped to make room for the larger turbines delivered to the plant in recent years or are standing idle waiting to be scrapped. It is believed that only the six⁴ turbines listed above were in operation as of March 1955.

Comments:

25X1

1. Previously reported as 15,000 to 17,000 KW; delivered in 1912.
2. Previously reported as 15,000 to 17,000 KW; delivered in 1916.
3. Previously reported as 8,000 to 10,000 KW.
4. Previously reported as a total of five turbines in operation.
